

MAURO D. ASUAJE G.

Remote Contractor — Data Wrangler & Pipeline Engineer
dvdasuaje1475963@gmail.com — mdasuaje.github.io

Professional Summary

Technical Data Analyst and Programmer specialized in data ingestion, extraction, and automated ETL pipeline maintenance. Proficient in transforming raw, unstructured, or chaotic datasets into clean, optimized databases using Python and SQL. Experienced in managing relational and non-relational database architectures with a strict focus on performance, data integrity, and asynchronous remote execution.

Technical Skills

- **Data Processing:** Python (Pandas, NumPy), Data Wrangling, ETL Frameworks.
- **Data Ingestion:** Web Scraping (Scrapy, BeautifulSoup, Selenium), REST API Consumption.
- **Databases & Querying:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB), Schema Design.
- **Infrastructure & Tools:** Linux CLI, Shell Scripting, Git, GitHub, Docker.

Selected Projects & Experience

Independent Data Engineering Contractor

Data Wrangler & Scripting Specialist

Remote
2024 – Present

- Built and automated highly resilient web scraping pipelines to extract, parse, and structure unorganized data into PostgreSQL.
- Designed Python ETL utilities to clean and normalize large JSON data payloads from multiple vendor cloud APIs.
- Leveraged advanced SQL scripting and database optimization indexing to reduce query execution overhead.

Education

Software Engineering / Technical Background

Specialized Independent Track in Data Processing, Analytics pipelines, and Backend Architecture.
